# Twelve systems we built. One year of posts that sell them.

This is every platform, chatbot, booking system and product MuleSoo has built — what each one does, what it costs, and a full 365-day posting calendar written to put them in front of the people who need them.

**12**

# How to run this

Four minutes a day. That is the entire commitment.

## The daily routine

1. Open this month's PDF in *marketing2/PDF/* and find today.
2. Post the picture shown on that page — the file name is printed beneath it, and the same image is in *marketing2/Images/*, sorted by month.
3. Copy the caption for the platform you are posting to. It is already the right length.
4. Publish. Reply to every comment within the hour — that is where the actual work is.

**The one rule that protects everything else.** There is not a single invented statistic in this system. No "+300% bookings", no "47 happy clients". Every claim is a capability a reader can verify by opening the live site. Three projects — Sena, Yewogen Derash and DR. Hospital — are still in development and are labelled **IN BUILD** wherever they appear. Never post those as launched. An agency caught inflating one number loses the credibility of the other eleven projects with it.

## The weekly rhythm

Each week runs straight through seven post types, so a project is explained and joked about long before it is ever offered. Only one day in seven asks for anything.

| Day 1             | Day 2                 | Day 3    | Day 4        | Day 5                 | Day 6            | Day 7        |
|-------------------|-----------------------|----------|--------------|-----------------------|------------------|--------------|
| PROJECT SPOTLIGHT | THE PROBLEM IT KILLED | TOO REAL | HOW IT WORKS | WHAT IT ACTUALLY DOES | BEHIND THE BUILD | WORK WITH US |

## Why every post names a project

Generic agency content — "five tips for a better website" — is written by ten thousand accounts and remembered by nobody. A post that says *we built YoYo Gym, here is the exact problem it solved* does three jobs at once: it proves the work exists, it teaches something real, and it tells a gym owner reading it that you have already solved their problem once. Every one of the 1,825 posts in this system names a project.

## Where the pictures come from

Each day has a designed 1080×1080 card carrying that day's line, in the project's own accent colour, with the founder's portrait in the frame. The square format posts natively to Instagram, Facebook, LinkedIn, X and TikTok, so one image covers every platform. The face matters: people follow and buy from people, and a feed of pure logos reads as an advertisement.

# The work

Twelve systems, each one live or in active development. This is what the year of posts is actually selling.

## MULESOO PLATFORM

[mulesoo.com](https://mulesoo.com)

### MuleSoo Digital Services

our own agency platform

The platform you are reading this from — it books its own clients, sells its own products and runs its own admin.

#### THE PROBLEM

An agency with a pretty website and no engine behind it is a business card that loads slowly.

#### WHAT IT DOES

- lead capture with instant email + WhatsApp alerts on every enquiry
- a Stripe store that takes card payments for digital products
- one secure command centre: leads, bookings, content, pricing, payments

#### UNDER THE BONNET

Next.js App Router, Supabase and Stripe, deployed on Vercel with a CI that refuses broken builds.

**The line that sells it:** Want the same engine under your own brand?

#MuleSoo #WebDesignPretoria #AlforBusiness #SouthAfricaTech #NextJS

## HABESHA EVENTS

[habeshaeventsplanner.netlify.app](https://habeshaeventsplanner.netlify.app)

### Habesha Celebration Events

Ethiopian wedding & event planning

An elegant events platform that turns wedding dreams into confirmed bookings, 24/7.

#### THE PROBLEM

Wedding planners lose bookings at 11pm, when the couple is excited and nobody is awake to reply.

#### WHAT IT DOES

- a site that looks like the events it sells
- enquiries captured around the clock, not just office hours
- one link that does the work of a hundred WhatsApp explanations

#### UNDER THE BONNET

React and Framer Motion on Netlify — the animation budget went entirely into the gallery.

**The line that sells it:** Planning weddings and still answering every enquiry by hand?

#HabeshaEvents #EthiopianWedding #EventPlanner #WeddingSA #MuleSoo

## YoYo Gym — AI Membership Platform

premium fitness

A full gym membership, booking and check-in system that runs the floor on autopilot.

### THE PROBLEM

A gym run on a paper register loses money to expired memberships nobody noticed.

### WHAT IT DOES

- members, plans and payments in one place instead of three books
- QR check-in that clears the morning queue
- an owner dashboard that answers "who is behind on payment" in one look

### UNDER THE BONNET

React + Vite on Vercel, with serverless functions in front of a Supabase Postgres schema.

**The line that sells it:** Running a gym off a register book and a good memory?

#GymSoftware #FitnessBusiness #YoYoGym #MembershipSystem #MuleSoo

## X-Boss Photography Studio

professional photography

A dark-luxury booking system with an AI assistant, an admin dashboard and signable PDF confirmations.

### THE PROBLEM

A photographer answering DMs between shoots is a photographer not shooting.

### WHAT IT DOES

- bookings taken while you are behind the camera
- a branded PDF confirmation the client actually keeps
- an admin view of today, upcoming and history in one screen

### UNDER THE BONNET

Next.js 16 with React 19, Supabase behind it, and @react-pdf/renderer producing the confirmation.

**The line that sells it:** Shooting all week and still booking clients by hand?

#PhotographyBusiness #StudioBooking #XBoss #BookingSystem #MuleSoo

## Shime Events & Planning

luxury event planning

A bilingual booking assistant that walks a client through seventeen steps and ends with a signed PDF contract.

### THE PROBLEM

Half your clients think in Amharic and your booking form only speaks English. That is half your market.

### WHAT IT DOES

- clients booking in the language they actually think in
- deposits collected without a single awkward phone call
- a signed contract in the client's inbox before they close the tab

### UNDER THE BONNET

A seventeen-step conversational flow with full state, so a refresh never costs the client their answers.

**The line that sells it:** Losing bookings because your form only speaks one language?

#EventPlanning #ShimeEvents #BilingualWeb #Amharic #MuleSoo

## Tsedi Catering & Events

catering & event management

A QR code that opens a personal booking assistant — no website, no app, no forms to chase.

### THE PROBLEM

A caterer cannot answer the phone with both hands in a pot.

### WHAT IT DOES

- bookings taken with both hands still in the kitchen
- deposits paid before you buy a single ingredient
- a check-in code you scan on the day

### UNDER THE BONNET

No website at all — the QR opens the assistant straight in the phone's browser.

**The line that sells it:** Cooking for ninety and answering enquiries at the same time?

#CateringBusiness #QRBooking #TsediCatering #AIAssistant #MuleSoo

## TSI AI Booking Assistant

hospitality & reservations

A reservations assistant that answers, qualifies and books, around the clock.

### THE PROBLEM

Most reservation enquiries arrive after closing time and are answered the next morning, to nobody.

### WHAT IT DOES

- every after-hours enquiry answered instead of lost
- leads arriving with name, contact and intent already captured
- your team freed from repeating the same six answers

### UNDER THE BONNET

Grounded strictly in the client's real services and prices — it is forbidden from inventing anything.

**The line that sells it:** How many enquiries went unanswered last night?

#AIChatbot #Hospitality #Reservations #CustomerService #MuleSoo

## Sena — AI Front Desk Receptionist

hotels

A voice receptionist for hotels: the guest clicks Call Reception and Sena actually answers.

### THE PROBLEM

A hotel front desk is unstaffed at exactly the hour a traveller needs it most.

### WHAT IT DOES

- reception answered at 3am without a night shift
- payment collected during the call, not chased afterwards
- a single-use QR guest ID scanned at the door

### UNDER THE BONNET

LiveKit carries the audio, faster-whisper listens, Piper speaks and Claude thinks — all self-hosted.

**The line that sells it:** Run a hotel? This one is nearly ready — early partners welcome.

#VoiceAI #HotelTech #Sena #Hospitality #MuleSoo

## Yewogen Derash (ወገን ደረሽ)

crowdfunding for Ethiopia

A crowdfunding platform where every campaign owner is identity-verified and no two campaigns share a wallet.

### THE PROBLEM

People stop giving online the first time a fundraiser turns out to be nobody.

### WHAT IT DOES

- donors who can see who they are giving to
- per-campaign ledgers that survive an audit
- payments only confirmed by verified webhooks

### UNDER THE BONNET

Next.js and Prisma over Supabase Postgres, with Auth.js RBAC for donor, owner and admin.

**The line that sells it:** Raising funds and need donors to trust the platform first?

#Crowdfunding #Ethiopia #YewogenDerash #FinTech #MuleSoo

## Pretoria Kidane Mihret Church Platform

Ethiopian Orthodox parish, Pretoria

A bilingual Amharic and English home for a parish, with the whole site editable by the church itself.

### THE PROBLEM

Congregations get their service times from a WhatsApp forward from 2019.

### WHAT IT DOES

- one accurate place for service times, in both languages
- content the church updates itself, instantly
- a digital home that matches the institution's dignity

### UNDER THE BONNET

Next.js and Supabase, with a bilingual content model rather than duplicated pages.

**The line that sells it:** Does your organisation need to speak two languages properly?

#ChurchWebsite #Amharic #Bilingual #Pretoria #MuleSoo

## DR. Hospital — AI Clinic System

clinics & hospitals

A clinic and hospital management system with AI intake — currently in active development.

### THE PROBLEM

Clinic reception is a queue, a phone and a paper diary, all competing for one person.

### WHAT IT DOES

- reception freed from the phone during consulting hours
- intake completed before the patient arrives
- one system for appointments, records and follow-up

### UNDER THE BONNET

In active development — architecture and access rules first, interface second.

**The line that sells it:** Run a clinic? We are taking early build partners now.

#HealthTech #ClinicSoftware #AIIntake #POPIA #MuleSoo

## MuleSoo Guides & Digital Store

digital products

The guides we wrote from real builds — bought once, downloaded instantly, used forever.

### THE PROBLEM

Most "learn to build" content is written by people who have never shipped for a paying client.

### WHAT IT DOES

- the exact process behind live client builds
- instant download, no subscription
- a shelf that keeps selling after it is written

### UNDER THE BONNET

Every guide is generated from the same toolchain we use for client documents.

**The line that sells it:** Want the process behind these builds, in writing?

#DigitalProducts #ClaudeCode #LearnToBuild #PassiveIncome #MuleSoo

## What it costs

Priced in Rand, because that is what we charge in. Every quote is fixed before work begins — the number does not move afterwards.

| SERVICE               | FROM               | WHAT THAT COVERS                                            |
|-----------------------|--------------------|-------------------------------------------------------------|
| Website design        | <b>From R3,500</b> | Business builds from R7,500 · enterprise quoted on scope    |
| AI chatbot            | <b>From R2,500</b> | Website + WhatsApp, trained on your own services and prices |
| AI automation systems | <b>From R4,500</b> | Booking, payment and follow-up flows joined end to end      |
| Design & sales widget | <b>From R3,500</b> | Greets, answers, books and takes deposits on your site      |
| Logo & brand identity | <b>From R800</b>   | Full identity packages from R1,800                          |
| Custom email setup    | <b>From R400</b>   | you@yourbusiness.co.za, migrated, with anti-spam records    |
| QR code design        | <b>From R300</b>   | Branded, print-ready, with scan tracking                    |
| PDF guides you sell   | <b>From R149</b>   | Written, designed and set up to sell on your own site       |

**What every build includes.** Mobile-first design, SEO setup, 30 days of free support after launch, and full ownership — the client owns the domain and the source code outright, with no monthly licence fee. Payment plans are available; ask.

## Where to send people

|                            |                                                                   |
|----------------------------|-------------------------------------------------------------------|
| Book a free 30-minute call | <a href="https://mulesoo.com/contact">mulesoo.com/contact</a>     |
| WhatsApp                   | <a href="https://wa.me/27688529333">wa.me/27688529333</a>         |

| Buy a guide                | <a href="https://mulesoo.com/store">mulesoo.com/store</a>         |
| See the work               | <a href="https://mulesoo.com/portfolio">mulesoo.com/portfolio</a> |

# Platform by platform

The same sentence does not work everywhere. Every caption in this system is already written to the register below — this page explains why it reads differently on each one.

| PLATFORM         | WHO IS THERE                                  | HOW TO POST IT                                                                                                                                           |
|------------------|-----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>LinkedIn</b>  | Decision-makers and referrals                 | Post 07:00–09:00 on weekdays. Lead with the insight, never the offer. No link in the first line — LinkedIn buries posts that send people away too early. |
| <b>Instagram</b> | Reach and brand memory                        | The card carries the post; the caption only has to earn the tap. Post 11:00–13:00 or 18:00–20:00. Six to eight tags, all of them relevant.               |
| <b>Facebook</b>  | Local business owners in South Africa         | Plain language wins. Share into local business groups where the rules allow it. Evenings and Sunday afternoons outperform weekday mornings.              |
| <b>TikTok</b>    | Reach with people who have never heard of you | Read the caption aloud over a screen recording of the actual system. The first two seconds decide everything. Post 18:00–21:00.                          |
| <b>X</b>         | Developers, founders and the tech-curious     | One idea per post. No thread unless the idea genuinely needs one. Two tags maximum.                                                                      |

## The three things that actually move the needle

**1. Reply to every comment within the hour.** The algorithm rewards it, and more importantly the person who commented is the closest thing you have to a lead today.

**2. Post the same card everywhere, but never the same caption.** Identical copy across five platforms is the fastest way to look automated. The captions here are already differentiated.

**3. When a post lands, send it to the person it describes.** A gym owner who liked the YoYo Gym post is not an impression. Message them the same day.

**Before you post an IN BUILD project:** say it is in build. "We are building this — early partners welcome" outperforms a fake launch, and it is the only version you can defend when somebody asks for a live link.
