How to use this. Find today. Post the picture on the left — the file name is printed under it, and the same image lives in *marketing2/Images/*. Then copy the caption for the platform you are posting to. That is the whole routine.

Every post names real work. There are no invented statistics in this document. Where a project is still in development it is flagged *IN BUILD* — never post those as launched.

Projects this month: Sena — AI Front Desk Receptionist · Yewogen Derash (ወገን ደራሽ) · Pretoria Kidane Mihret Church Platform · DR. Something MuleSoo Digital Services taught us:

Every enquiry should fire two notifications: email and WhatsApp. The one you check is the one that closes.

Two more from the same build:

- A booking is not finished until the client is holding a document. Generate the PDF in the same breath as the confirmation.
- Admin panels deserve real security. Password, email 2FA, audit log — a client list is worth stealing.

All three are in the live product, not in a slide deck. See it: <https://mulesoo.com>
