

January 2027

31 days · 155 ready-to-copy posts · picture included

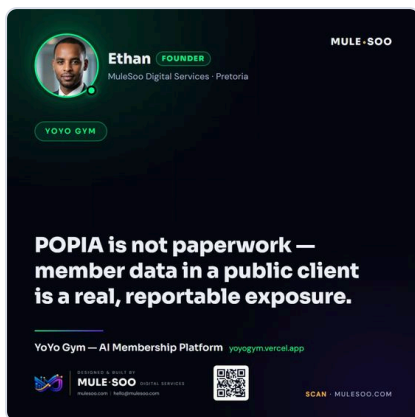

How to use this. Find today. Post the picture on the left — the file name is printed under it, and the same image lives in *marketing2/Images/*. Then copy the caption for the platform you are posting to. That is the whole routine.

Every post names real work. There are no invented statistics in this document. Where a project is still in development it is flagged *IN BUILD* — never post those as launched.

Projects this month: YoYo Gym — AI Membership Platform · X-Boss Photography Studio · Shime Events & Planning · Tsedi Catering & Events · TSI AI Booking Assistant · Sena — AI Front Desk Receptionist · Yewogen Derash (ወገን ደረሽ) · Pretoria Kidane Mihret Church Platform · DR. Hospital — AI Clinic System · MuleSoo Guides & Digital Store · MuleSoo Digital Services · Habesha Celebration Events

DESIGNED & BUILT BY

Something YoYo Gym — AI Membership Platform taught us:

POPIA is not paperwork — member data in a public client is a real, reportable exposure.

Two more from the same build:

- QR check-in beats fingerprint readers for cost, hygiene and the day the hardware dies.
- Ship the owner a manual PDF. Software nobody can operate is software nobody renews.

All three are in the live product, not in a slide deck. See it: <https://yoyogym.vercel.app>

Amharic is usually bolted onto a site last, badly, if at all.

That was the brief behind Pretoria Kidane Mihret Church Platform.

We built it around one idea: service times, priest, address and contact all editable from an admin panel, no code touched.

A bilingual Amharic and English home for a parish, with the whole site editable by the church itself.

See it: <https://mulesoo.com/portfolio>
