

MARKETING 2 · PROJECT-LED POSTING CALENDAR

April 2027

30 days · 150 ready-to-copy posts · picture included

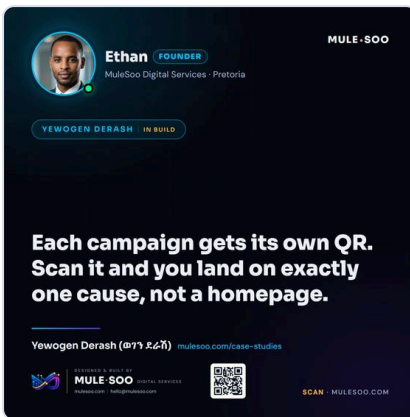

How to use this. Find today. Post the picture on the left — the file name is printed under it, and the same image lives in *marketing2/Images/*. Then copy the caption for the platform you are posting to. That is the whole routine.

Every post names real work. There are no invented statistics in this document. Where a project is still in development it is flagged *IN BUILD* — never post those as launched.

Projects this month: Yewogen Derash (ዮወግን ደረሽ) · Pretoria Kidane Mihret Church Platform · DR. Hospital — AI Clinic System · MuleSoo Guides & Digital Store · MuleSoo Digital Services · Habesha Celebration Events · YoYo Gym — AI Membership Platform · X-Boss Photography Studio · Shime Events & Planning · Tsedi Catering & Events · TSI AI Booking Assistant · Sena — AI Front Desk Receptionist

DESIGNED & BUILT BY

Something Pretoria Kidane Mihret Church Platform taught us:

Recurring liturgical events need a real calendar model, not a list of dates typed by hand.

Two more from the same build:

- Dignity in design is mostly subtraction. Remove the animation that is drawing attention to itself.
- Amharic is not a translation layer. Design the type, the line height and the spacing for it from the start.

All three are in the live product, not in a slide deck. See it: <https://mulesoo.com/portfolio>

#ChurchWebsite #Amharic #Bilingual

Something TSI AI Booking Assistant taught us:

Reply speed beats reply polish. Answering in four seconds wins bookings that a perfect email loses.

Two more from the same build:

- Give it a clear escalation rule. "I do not know, here is a human" is a feature, not a failure.
- Give the assistant your real prices. A bot that invents a number has just made a contract for you.

All three are in the live product, not in a slide deck. See it:

<https://mulesoo.com/services/chatbot>
