Every post names real work. There are no invented statistics in this document. Where a project is still in development it is flagged *IN BUILD* — never post those as launched.

Something Shime Events & Planning taught us:

Terms acceptance must be a recorded event with a timestamp, not a checkbox that vanishes.

Two more from the same build:

- Long forms are fine. Long forms with no progress indicator are not.
- Check availability live, inside the flow. Confirming a date you cannot honour is the costliest bug you can ship.

All three are in the live product, not in a slide deck. See it: <https://shimeeventplaning.vercel.app>
