Welcome — Let's Plan Your Website

This guide does the thinking for you. Answer in plain words.

You don't need to know anything about websites, code, or design to use this guide. We've turned everything a developer needs to know into simple questions with tick-boxes and blank spaces. Just answer what you can — if you're unsure about a question, leave it blank and we'll help you decide together.

There are two easy ways to use this document:

Option A — Fill it in right on your computer (no printing needed)

1. Open this PDF in any free reader (Adobe Acrobat Reader, or your browser).
2. Click any box to tick it ☐, and click any shaded space to type your answer.
3. Save the PDF, then email it back to MuleSoo. That's it — we take it from there.

Option B — Let an AI tool interview you (fastest)

1. Upload this PDF to any AI assistant (ChatGPT, Claude, Gemini, Copilot, etc.).
2. Paste the instruction shown on the "For Your AI Tool" page (near the end).
3. The AI will ask you these questions one by one, in plain language.
4. Download the finished "Website Requirements PDF" it creates, and send it to us.

Either way, the result is the same: a clear picture of the website you want, so MuleSoo can build the right thing the first time — on time and on budget.

For Your AI Tool (Optional Shortcut)

Prefer to be interviewed? Hand this whole guide to any AI assistant.

If you'd rather not fill this in by yourself, upload this PDF to any AI assistant (ChatGPT, Claude, Gemini, Microsoft Copilot, and others) and paste the instruction in the box below. The AI will read this guide and interview you — one friendly question at a time — then produce a clean, customised requirements document you can download and send to MuleSoo.

Copy & paste this to your AI tool:

You are my website planning assistant. I have uploaded the "MuleSoo Corporate Website Master Guide." I am not technical, so please guide me gently.

1. Read the whole guide and use ONLY its sections and questions as your script.
2. Ask me the questions STRICTLY ONE AT A TIME. Never send a long list. Wait for my answer before you ask the next question.
3. Before each question, add ONE simple sentence that explains what it means and WHY it matters, plus a short real-world example or two sensible options I can just pick from. Keep it friendly and jargon-free.
4. If my answer is unclear or missing, kindly explain further and suggest a good default — never make me feel stuck.
5. Go section by section (About Your Business → Goals → Customers → Pages → Look & Feel → Features → Content → Practical → Timeline & Budget).
6. When we finish, compile all my answers into a clear, professional "Website Requirements Document" in corporate tone, under the same headings, restating each of my answers one by one.
7. Then give it to me as a downloadable PDF to send to MuleSoo Digital Services.

Start now: greet me, explain how this will work in one line, then ask question 1.

After the AI makes your document

Download the PDF it produces, double-check the details are right, and email it to hello@mulesoo.com along with your logo and photos. We'll convert it into a world-class website — built exactly around your answers.
